

Director's Message

Humans leave their mark everywhere they go. They leave fingerprints on the things they touch, footprints in the sand where they walk, and personal impressions on those they meet. A less considered type of impression is an 'internet footprint' which is created whenever a

person posts to public message boards or blogs.

Web posts often make permanent impressions on those who read

- Sep 23 – 27 Philadelphia
- Nov 11 – 15 Melbourne

them. Web posts that are timely, accurate, and professional can serve to help others and create a positive image for their authors. Bad or inappropriate posts can cause permanent damage and even harm one's business. When posting on the net, following a few simple rules or netiquette can help to avoid creating a bad impression in cyberspace.

- Do not post anything you would not (or should not) say in public
- Always refrain from using foul, profane, or vulgar language
- Do not badger others or attack their personal beliefs
- Avoid over exposure. Chronic posting or posting 'round the clock' gives the impression that you have nothing better to do.
- Keep in mind that posts can be viewed worldwide across different languages and cultures. Humor and witticism rarely translate well; sarcasm is often magnified.

Lastly, remember to think before you hit the 'send' button. Web posts often have an unintended permanence and are available for the world to see. Webmasters are rarely under any obligation to remove or edit posts regardless of how unflattering they may be.

SuccessIRies 105 NFPA 70E – Are You in Compliance?

The National Fire Protection Association has been publishing NFPA 70E Standard for Electrical Safety Requirements for Employee Workplaces since 1979. This safety standard has been expanded and is now in widespread use throughout the world. NFPA 70E is applicable to any workplace and is intended for use by employers, employees, and OSHA. This course focuses on the history and application of NFPA 70E, changes included in the current edition, and
