

Volume 11 Issue 11 - November 2022

Director's Message

During the month of November, Americans celebrate two national holidays – Thanksgiving Day and Veterans Day. While Thanksgiving is traditionally thought of as an opportunity to reflect upon the bounty that we enjoy, Veterans Day is also a day for giving thanks and recognition to those who have served our nation.

This year marks the 10th anniversary of [Infraspection Institute's Scholarship program for veterans](#). Since 2012, our scholarship program has provided nearly \$100,000 in tuition for US service men and women who have enrolled in our Certified Infrared Thermographer® training courses.

To all of our veterans, thank you for your service and the sacrifices you have made. For those still serving our nation, thank you for your continuing service. May God bless all of you and keep you safe wherever your duties take you.

To all of our readers, we wish you a safe and Happy Thanksgiving!

Training Scholarships for US Veterans

In 2012, Infraspection Institute established the Christopher Seffrin Memorial Scholarship for Veterans as a tribute to those who have served our country. As we observe Veteran's Day this month, Infraspection Institute extend a heartfelt Thank You to our service members and invite you to take advantage of the benefits of this unique training opportunity.

The Christopher Seffrin Memorial Scholarship is open to all US veterans who have served in the US Armed Forces and have been honorably discharged. Scholarships are funded by Infraspection Institute and may only be applied to courses purchased through the Infraspection Institute website.

Scholarships do not apply to refresher courses and may not be combined with any other discount. Eligible applicants are limited to one scholarship per qualifying course in which they are enrolled up to a maximum of three courses.

Scholarships of up to \$500 are available for Infraspection Institute Certified Infrared Thermographer® training courses and Level I, II, and III thermography courses available through Infraspection's Distance Learning program.

Save Big on TI Reporter™ Software

In addition to streamlining your infrared report writing, now you can save even more money with TI Reporter™ software. For a limited time, annual subscriptions are available at a 15% discount versus our monthly pricing.

Combining cloud technology with state-of-the-art features, TI Reporter™ is the world's first cloud-based thermography reporting software that works with all thermal imagers. Reports can be generated quickly and easily from one's office or while in the field. Because it is cloud-based, TI Reporter™ works with all computer operating systems. There is no need to install any type of program or software onto your computer.

Written by practicing thermographers, TI Reporter™ contains preformatted templates for a wide variety of infrared inspection applications including electrical systems, mechanical systems, building envelopes, flat roofs, underground piping, and steam systems. TI Reporter™ automatically calculates temperature limits for electrical and mechanical equipment and can provide cost savings reports. The software is designed for in-house thermographers as well as thermographic consultants.
